SUMMARY

A highly dependable and detail-oriented Administrative Professional with 20 years of experience in public administration and a solid academic foundation in Electronic Engineering. Exceptional expertise in drafting, planning, and proofreading high-level administrative documents and corporate reports. Proven track record in managing diverse public support programs, regulatory compliance, and community relations without reliance on

litigation. Seamlessly integrates administrative precision with technical innovation, demonstrating extensive capabilities in full-stack Python automation, Android application development, and GenAI system implementations. Driven by a strong sense of responsibility and adaptability to complex, cross-functional projects.

PROFESSIONAL EXPERIENCE

Administrative Fine/Civil Servant (7th Grade Specialist) | Local Government, South Korea
Jan 2006 – Present

Public Support Program Management:
Successfully executed and managed diverse government-backed funding and support initiatives, including agricultural subsidies, small business financial aid, and welfare programs for low-income and vulnerable populations.

Safety & Regulatory Compliance: Formulated and established comprehensive local Safety Management Plans, while actively executing field enforcement operations such as illegal open burning crackdowns.

Licensing & Environmental Administration: Managed rigorous regulatory reviews and licensing procedures, including Mountainous District Land-Use Permitting (산지전용허가).

Public Relations & Conflict Resolution: Directly handled and resolved diverse civil complaints with a high success rate, maintaining excellent community relations through structural problem-solving.

Document Architecture & Planning: Authored and optimized extensive policy reports, project proposals, and official guidelines, showcasing

an advanced structural understanding of professional documentation.

TECHNICAL & AUTOMATION PROJECTS

Android Application Development (Independent Developer)

Developed and published multiple Android utility applications, focusing on clean architecture and functional UI.

Core Solutions Published:

Productivity: A focus-booster application that enforces app blocking via customized time settings.

Finance & Commercial: A Real-Time Currency Converter & Calculator and a Crypto QR-code ordering client.

Media & Utility: A minimalist video player and an automated lottery number generator.

Quantitative Trading & Automation Systems

Crypto Automated Trading Bot: Built and

deployed an automated cryptocurrency trading system using Python.

Market Intelligence Scraper: Developed a real-time financial news crawler that delivers instant market alerts via integrated messenger APIs.

Deep Learning for Markets: Engineered deep learning models for stock market trend prediction and quantitative analysis.

GenAI & Content Automation Systems

AI Image Engineering: Developed specialized Stable Diffusion LoRA models to produce and utilize high-quality generative artwork.

Blog Automation: Built and operated an automated workflow system for Tistory blogs to maximize content distribution efficiency.

Hardware & Network Infrastructure

Built, optimized, and managed high-performance Ethereum mining rigs, including custom hardware assembly, mining software configuration, and network connectivity.

Managed corporate-level Windows environments, internal software installation, and PC hardware infrastructure.

EDUCATION

Bachelor of Science in Electronic Engineering |
University Name

Major in Japanese | Foreign Language High
School

CORE SKILLS & LANGUAGES

Programming & Tech: Python, Android Development, Deep Learning, GenAI (Stable Diffusion, LoRA Tuning), Web Scraping/Crawling, Automation Tools.

Administration: Policy Planning, Document Drafting/Proofreading, Public Support Program Administration, Licensing & Permitting, Risk Management.

Languages: Korean (Native), Japanese (Fluent /

Professional Translation & Conversation).
